FME Apps

What is Shortcuts in iOS?

Shortcuts 4+

Do more with your apps

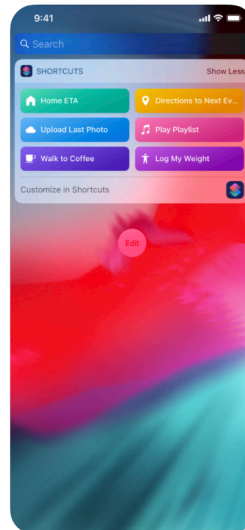

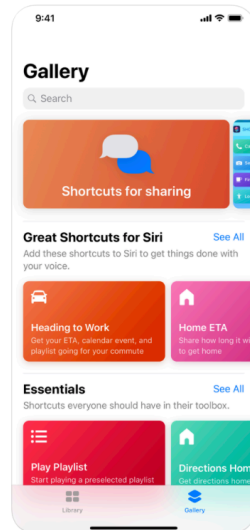

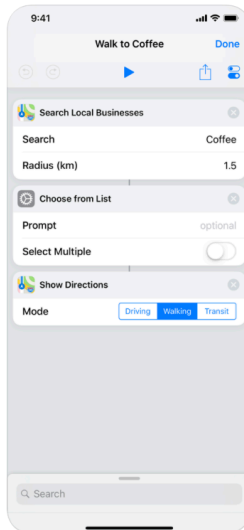

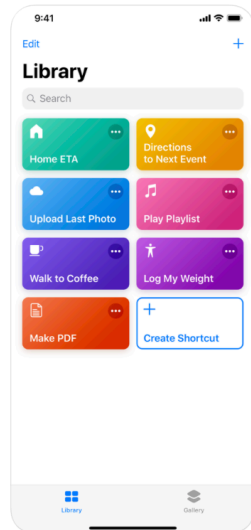

Apple

#142 in Productivity

★★★★★ 4.3, 8K Ratings

Free

Screenshots [iPhone](#) [iPad](#)

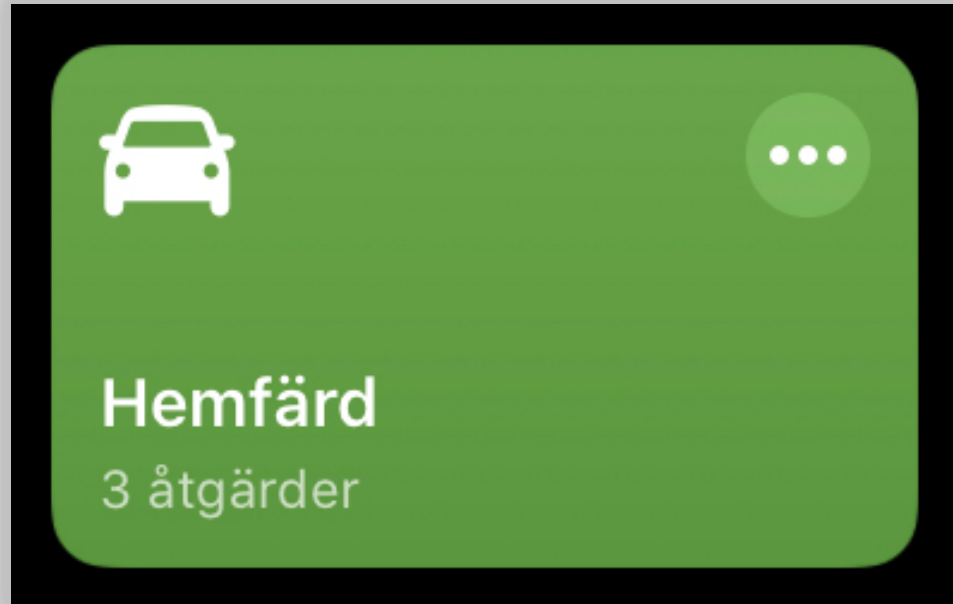

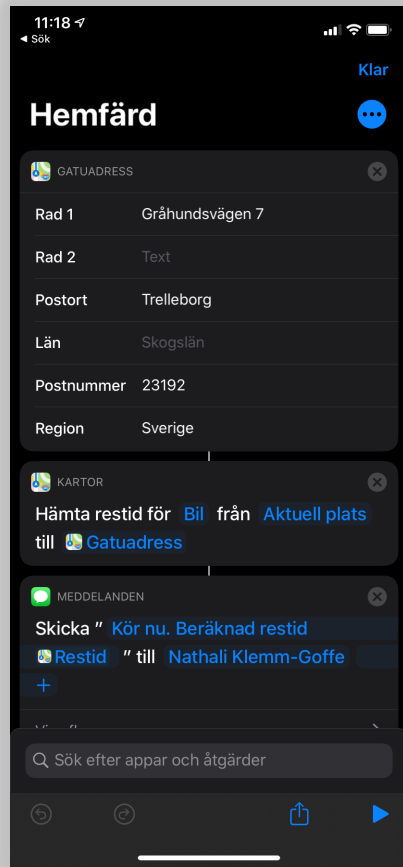

Drag & drop interface for creating your own app or automation.

Includes built-in actions and works with many apps. For example Contacts, Calendar, Maps, Music, Photos, Camera, Reminders, Safari, Health etc.

Shortcuts can be launched from the Today widget, from Search or by asking Siri. You can add an app icon to your home screen for your favorite Shortcuts.

Shortcuts opens up incredible possibilities to automate things you do regularly on your iPhone and iPad.

Example (without FME..)

DEMO

Apple Maps -> FME Server

iPhone

User adds a point in Apple Maps on iPhone

Shares to a shortcut that calls a workspace

FME Server

User adds a point in Apple Maps

Workspace receives parameters and stores data in the shared resources data folder.

Any Browser

Call FME Server APP

FME Server

Workspace reads all stored data-files and uses HTMLReportGenerator to produce a map. Streamed back to client
